**This is Loveless dressed in the leather of Metal Machine Music and covered in the ambient beauty of Eno. If shoegaze music ever was intended to be radically redesigned by trashy electronic tools, this may well be the outcome of such a criminal electro-transformation!**

**This is the second album from Gothenburg's no1 electronic duo – Pistol Disco. By using improvisation and primal skeleton elements of pop/rock they create a unique confrontational wall of sound that makes you wonder if the music is your friend or foe?**

**Since the start 2004, Pistol Disco have released a numbers of CDRs, a 10" EP and previous years critical acclaimed debut record – Two. Initially the music was harsh improvised noise but with Radiation they are moving towards song structures, melodies and rhythms. But, as to expect, the avant-garde elements are still present and the result is music that screams of intensity and excitement.**

**Lineup:      Alexander Palmestål      vocals & keyboards**
